

Padel & Padbol

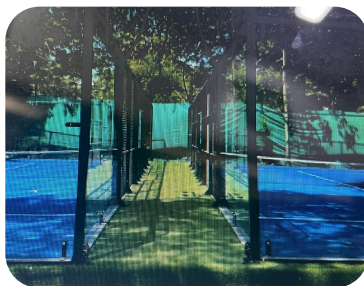

UNDERSTANDING PADEL FLEX

Complete Padel Court Solutions by SUNFLEX

PadelFlex is SUNFLEX's dedicated turnkey padel court solution, designed and engineered to international standards. From the structural framework and panoramic glass walls to professional-grade artificial turf, lighting and accessories, every component is carefully selected to deliver a world-class playing experience.

Built for durability, performance and aesthetics, **PadelFlex** combines premium materials with expert installation to create courts that are ready for competition, training and recreational play.

How EASY is it to install a PadelFlex Court?

Minimal Space Requirements

A single court requires just 21m x 11m. Maximize your space, convert one tennis court into two-three padel courts!

Flexible Ground Options

Suitable for installation on 15cm-thick concrete. Existing concrete or resin sports courts work perfectly too.

Quick Installation:

Each court is installed in just 7 days by our expert team of professionals.

Efficient Manufacturing:

Custom-built to your specifications, delivered in as little as 3 weeks.

THE PADEL**FLEX** ADVANTAGE

Every **PadelFlex** court is engineered to withstand intensive daily use and varying weather conditions. The galvanized steel framework, anti-corrosion coating system and toughened glass panels ensure exceptional structural stability and long service life.

To suit different project requirements, Sunflex offers two court configurations:

PadelFlex Panoramic is designed with unobstructed panoramic glass walls, making it an ideal choice for professional tournaments, clubs, premium sports facilities and venues where spectator experience and aesthetics are a priority.

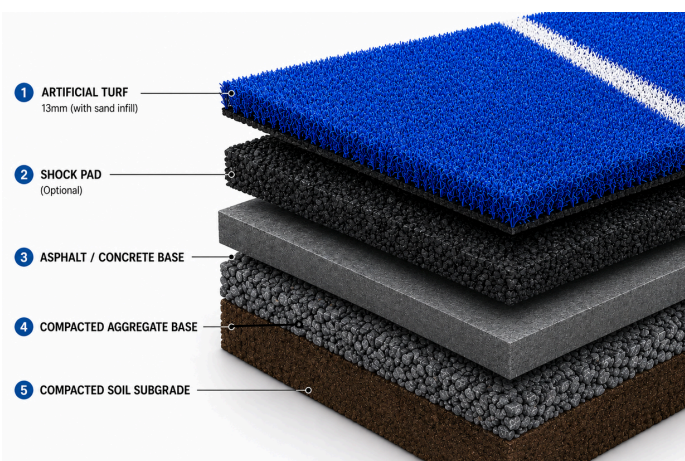

PadelFlex Classic features a traditional court design that delivers the same playing experience with a practical and cost-effective approach. It is well suited for schools, residential communities, sports complexes and recreational facilities.

Both court options are manufactured using high-quality materials and can be customized to meet your project's specific requirements, ensuring reliable performance, durability and a professional playing experience.

Our 13 mm monofilament texturized artificial turf is designed to deliver:

The silica sand infill system enhances stability, ensuring consistent ball bounce, excellent traction and grip, improved player comfort, reduced maintenance and long-lasting performance for a professional playing experience.

UNDERSTANDING **PADBOL**

Padbol transforms into an entirely new sporting experience.

Combining the technical demands of football with the pace of tennis and the strategy of squash, **Padbol** creates a dynamic environment where every touch, rebound and movement challenges players to think faster, react quicker and perform better.

SUNFLEX is proud to bring **Padbol** infrastructure to India, helping sports facilities introduce one of the world's fastest-growing football-based sports.

Our Padbol courts are built with premium artificial turf for consistent play, precision rebound tempered glass, a heavy-duty galvanized steel structure with a durable powder-coated finish and energy-efficient LED sports lighting, delivering a high-performance, durable and low-maintenance playing experience for both indoor and outdoor installations.

The **PADBOL** Advantage

As India embraces new sporting experiences, Padbol offers a chance to stand out with a concept that's still fresh, exciting and largely untapped. The early movers won't just build a court, they'll build a destination.

Padbol gives you the opportunity to introduce a new sporting experience before it becomes mainstream in India, attracting curious players, football enthusiasts and new communities while positioning your facility as a leader in innovation.
